

FINAL MILE SOLUTIONS

We at ifoodbag AB are passionate about solving the so-called final mile challenge. That is, to offer a passive cooling solution to keep goods cool or frozen on their way to the end consumer.

CERTIFICATIONS AND PATENTS

The final mile solutions recommended for each unique logistic flow are built around our innovative and patented (EP3140223, EP3370563) or patent pending products and systems.

We only work with partners that share our care for the environment.

ipharmabag® is FSC-certified (Forest Stewardship Council). Glue and print colors used are environmentally friendly.

ISO 9001:2015 certified quality management system and has an Environmental Management System compliant to the requirements of ISO 14001:2015.

ifoodbag® pouch

Paper Thermal bag

Description

A thermally insulated 100% paper bag primarily for chilled or frozen goods. Designed to keep its content temperature controlled during transportation, both in warm ambient temperatures and in high humidity conditions.

Features

The ifoodbag® range of protective final mile products provide a secure and easy method of packing temperature sensitive, chilled, or frozen products. Strong performance in burst strength, durability, and cushioning. Tough white or brown kraft outer paper with a 100% recycled cellulose fiber lining and a brown kraft inner paper. A “V-folded” construction, with a doubled glued bottom flap and no side seams, provides high resistance against bursting and puncture. Maximum protection and temperature control. Fully recyclable as paper/paper packaging.

For larger orders sizes, we can tailor the ifoodbag® to meet the requirements of your business. Printing your logo, more size options, bottom folding, or handles.

Advantages

- White outer paper for its reassuring associations with purity and hygiene or unbleached natural brown kraft to signal environmental consciousness.
- Excellent thermo protection and temperature control
- Wet strength
- High resistance to tear, puncture and corner crush
- Superior tear resistance when wet and dry
- Made from a renewable resource with renewable energy
- Optimum blend of virgin and recycled fiber insulation
- Fully recyclable
- Naturally biodegradable
